

April 28, 2011

To whom it may concern,

We, I.B.I Israel Biomedical Innovations Ltd., (Formerly Endogun Medical Systems Ltd.) are working with 3BY for over five years. We are taking advantage of their full expertise clean room services – high pressure plastic injection, sub-assemblies and assemblies and blisters and pouch sealing. All these activities are accompanied with strict quality control activities. In addition, warehouse services as final packaging and transport, storage and more.

During the years of working together we have experienced good professional skills, human skills and good communication.

3BY is our sole provider for the services mentioned above and we recommend working with them

Kind regards,

Eitan Hod,
Executive VP R&D and Operations
I.B.I Israel Biomedical Innovations Ltd.
(Formerly Endogun Medical Systems Ltd.)
