To whom it may concern,

Sirs,

Re: 3BY as Medimop's Sub contractor

Medimop develops and sales medical devices for reconstitution of drugs made of powder and liquid. Medimop products are mostly made of injection molded plastic materials, assembled with automatic or semi automatic machines, pack in a sterile unit packaging form and sterile by Gamma irradiation or ETO.

All Medimops' products are produced by sub contractor and 3BY is the first one to work with us. For more than 12 years 3BY established itself as a professional, efficient and reliable sub contractor for Medimop.

3BY perform high level of injection molding processes which result with accurate injection molded plastic components for the assembly of our devices. Complicated and sophisticated high speed assembly machine were installed by Medimop at 3BY clean room and are been operated by 3by employees to Medimop's full satisfaction.

Quality system is managed by 3BY and performs at all time in a professional manner and according to Medimops' high level of requirements. Medimops' Customers perform audits at 3BY facility and all of them came out with limited amount of observation.

3BY is recommended as subcontractor in the Medical device manufacturing field and will continue to serve as such for Medimop.

Sincerely,

Jacob Weiser

General Manager
